

Business Plan

1. Introduction

Upkeep Shettleston Community Enterprises Ltd ("Upkeep") is a successful social enterprise, established in 2005.

We are a wholly-owned subsidiary of Shettleston Housing Association (SHA) and a company limited by shares. 'Upkeep' is a commercial trading company with a turnover of around £2.5 million and employs 46 staff (44.4 FTE).

We have our own Board which operates in accordance with an Independence Agreement and a Service Sharing Agreement with SHA.

We provide SHA with a range of services including:

- Day to day and cyclical maintenance
- Void works and Major Repairs
- Stair cleaning, back court maintenance and bulk waste uplift.
- Landscape gardening

In addition to Shettleston, Upkeep also provides services on a much more limited scale to a range of other RSL's and private clients.

From its inception in 2005, as an estate services provider, Upkeep grew rapidly in the ensuing years and built up an external customer base in addition to a fast-growing role in the delivery of SHA's repairs and maintenance programme.

We have always had a strong social purpose and focus on community benefit, particularly through the contribution we can make to local employment and training opportunities.

2. <u>What we are about...</u>

a) <u>Our Purpose</u>

We are a social enterprise, providing high quality, value for money property maintenance and estate management services to Shettleston Housing Association and its tenants. We contribute to the local community and economy through the creation of employment, training and development opportunities in the area.

b) <u>Our Vision</u>

Our vison, which we share with our parent, is of:

Thriving and prosperous local communities where all residents enjoy great homes and services, an attractive physical environment, and good life chances.

c) <u>Our Values</u>

Our values, and the behaviours that we believe are required to underpin these (also shared with SHA) are:

- **Customer service**: commitment, service excellence, professionalism, engagement, respect
- *Making a difference for the community*: achievement, social conscience, environmental impact, social & economic Impact, innovation
- **Teamwork:** partnership working, creative problem solving, communication, accountability, social Inclusion
- Fairness: equal treatment for all, honesty, trust, integrity, openness

3. <u>Strategic analysis</u>

We keep our operating environment under review and consider the company's strengths, weaknesses, opportunities and threats to be as follows:

Strengths	 Long established company with track record and experienced, skilled and committed staff team.
	 We benefit from the support of our parent, Shettleston Housing Association (SHA) – particularly in terms of financial management, governance and compliance, HR and IT support.
	• SHA is our main customer and its business is relatively stable.
	 Supplementary external estate management and reactive works contracts continue to be received and it is anticipated this will continue into 2024/2025. Good overall performance in service delivery.
	 Recent VFM study confirms that prices for work are competitive.
	 Well-resourced in terms of premises, equipment and vehicles.
	 A range of trades and services offered.
	 Stable finances with surpluses projected into future years.
	 Track record of delivering benefits to the community through job and training opportunities and good relationships with other community bodies.

SWOT analysis

Weaknesses	 Range/capacity of trades has been adversely impacted by recruitment difficulties in recent years and a potential need to review competitiveness of salaries and conditions of service offered. However, recent attempts at recruiting an additonal painter and joiner have been successful, potentially showing signs of movement in the market. Potential scope for improved consistency in quality of some services. SHA perception of a need for a more commercially-focussed approach to compete with external contractors for SHA planned maintenance contracts. Scope for further strengthening of Board with specific skills.
Opportunities	 Opportunity to secure longer term commitments to current works from SHA. Potential for future expansion into more planned / major works.
	 Potential to tender for additional external works – particularly with neighbouring RSLs - although main focus to continue to be on SHA going forward.
	 General waste collection situation in Glasgow offers potential opportunities to sell expertise and services in respect of bulk uplift.
	 Developing technology opens up opportunities for cost saving /efficiency and effectiveness improvement (e.g. drone technology and new roof maintenance equipment).
	 Potential savings on purchase of materials and plant through use of national procurement frameworks.
	 "Cost of living crisis" exacerbates existing community needs and may open up additional grant funding opportunities to meet those needs.
	 Climate change and bio-diversity objectives amongst national and local policy makers opens up opportunities to diversify into greener activities.
	 Potential support from agencies such as Skills Development Scotland (SDS) to help with our approach to staff development and working arrangements.
Threats	 Availability and cost of materials, labour, equipment and fuel due to economic disruption & inflation caused by Brexit, Covid and war in Ukraine.

•	Potential effect of economic change on SHA's overall financial position may impact on contract prices/hourly rates and volume of works to be awarded going forward.
-	Glasgow City Council arrangements for allowing housing associations free use of waste depots for bulk items for their tenants subject to ongoing review and could jeopardise this business area. Recently introduced changes in legislation to combat the prevalence of Persistent Organic Pollutants 'POPS' in the waste stream may hasten the arrival of these charges.The impending SHA rent and service charge restructure will involve consultation with customers around services and potentially result in changes/reductions to services currently provided by Upkeep.
•	Particular health and safety risks due to:
	- nature of business and work carried out.
	 risk of increase in mental health and other issues amongst staff due to wider economic/social situation.
•	Ongoing need to meet other legal/regulatory requirements, including those arising from being part of an RSL Group e.g. FOI.
	Heightened cyber security risks in global environment.

Upkeep's Board regularly reviews the key risks facing the organisation and action required to best manage these. A copy of the summary of our Risk Register at April 2024 can be seen at **Appendix 1**:

4. Progress in 2023/24

Progress made against last year's Delivery Plan is outlined below:

Objective 1: Continue to improve customer service and value for money to SHA

Upkeep's main customer is Shettleston Housing Association (SHA). SHA periodically carries out a value for money (vfm) review of Upkeep's services and the latest of these was concluding at the time of the adoption of the 2023 Plan with some further work to be carried out. This had included an independent review of Upkeep charges to SHA by the Ewing Somerville Partnership (quantity surveyors) which confirmed that Upkeep's charges for most activities were competitive and represented value for money.

Following the positive outcome of the VFM review several key tasks have been completed in the 2023/24 year to improve service delivery and ensure that Upkeep continues to provide the Association with a high quality, responsive level of service.

The methodologies used to create invoices through the system have been streamlined to reduce labour intensive processes and create uniformity across voids, reactive and cyclical works.

SHA's new framework agreement for additional supporting contractors has been implemented and baseline data on costs and timescales will be collected, reviewed, and shared with Upkeep as necessary to provide an ongoing comparison of costs between Upkeep and the independently procured companies across a variety of disciplines.

SHA has rolled out a new lettable standard and Void procedures with input from the team at Upkeep. It is hoped this will reduce turnaround times for Voids, clearly outline a baseline standard for the works required and ultimately improve the standard of properties across SHA's stock. This is continually monitored with weekly and monthly meetings taking place involving key personnel across the group.

The team at Upkeep continue to work well with their colleagues in maintenance at SHA which has improved the scheduling of works allowing for greater clarity in forward ordering materials and helping ensure jobs are carried out 'right first time'.

The management team at Upkeep continually reviews and benchmarks the speed and quality of works provided by different staff members and are confident the team in place provide a high-quality level of service to SHA.

Through clear communication and a mutual understanding and respect for each other's roles within the group structure, working relationships between Upkeep and the maintenance team are developing well. Regular meetings continue to be held providing a focused platform to discuss ongoing works and resolve any issues in a timely fashion.

<u>Objective 2</u>: Continue to develop our staffing and working arrangements to ensure that Upkeep has a high performing culture and is seen as a great place to work.

Upkeep continued to focus on staff training and development.

All staff appraisals have been completed with follow up reviews scheduled in advance of the new financial year. The process has allowed staff a platform to discuss their current roles, aspirations for the future, request training and where necessary ask for additional support. They have also provided the management team the opportunity to address underperformance and encourage staff development as appropriate. This process will be ongoing year on year.

The new attendance management policy has been implemented across the group allowing for greater clarity of process.

Upkeep's sickness absence rate was slightly above the 4% target at the end of the third quarter but this was adversely impacted by some unavoidable long-terms absences and the underlying trend continues to be positive compared to earlier years.

We continue to look for appropriate ways of developing a shared culture /ethos and all staff within the group show a real commitment to the tenants of Shettleston. Many of Upkeep's staff team are local to the area and as such have a vested interest in improving the community and built environment managed by SHA.

We held a successful joint away day on 3rd November which saw a number of staff from across the group visit Boom Battle Bar in the city centre. The event was enjoyed by all and provided a great opportunity for staff to socialise away from the offices.

Objective 3: Strengthen and develop the business to ensure ongoing viability

Good progress has been made with the assessment by the Director of Finance and Corporate Services (DFCS) of the profitability of each of Upkeep's business cost centres.

The delay in finalising new salaries/pension arrangements has meant that it has taken longer than anticipated to review Upkeep's finances and to finalise charge out rates for 2024/25 but amended rates have now been assumed within the final budget.

<u>Objective 4</u>: Deliver employability support and opportunities and continue to evaluate and review our social impact and role in the community going forward.

Upkeep continued to provide apprenticeship and training opportunities. We currently support three apprentice Joiners funded by CITB who are progressing well. It is hoped that these three individuals will be key to the success of Upkeep winning additional work from SHA in the coming years when they are full time served.

We continue to work with Glasgow Guarantee with three staff members having joined us through their employability support programme and we continue to provide work experience in conjunction with St Andrews Secondary school.

Consideration will also be given to the feasibility of offering apprenticeship for Painters in the coming year with funding and college places already secured for July /August 2024.

Upkeep has analysed the makeup of our workforce in the past year to measure our impact on the local employment market and identified that of our full-time permanent staff over 70% lived in the East end of Glasgow and over 70% of staff had been with Upkeep for over five years. This clearly shows that Upkeep has a positive impact on the employment market in the area and that staff retention is high.

<u>Objective 5</u>: Ensure that Upkeep is achieving high standards of governance and compliance throughout the business

The Group-wide Policy on Equality, Diversity and Human Rights was adopted. The integration of the group wide processes regarding commitment by staff and Board members to the Code of Conduct and in relation to declaration of personal interests have been completed.

The Board has continued to focus on risks and compliance issues. There were no significant issues of non-compliance with legal and regulatory requirements during the year.

To ensure that we achieve our Strategic Objectives as outlined above a Delivery Plan has been agreed (see **Appendix 2**). This sets down specific projects/targets for each Objective showing lead responsibilities, target timescales and an indication of the risk to the Company of non-delivery of each item.

5. Our Strategic Objectives

Our Strategic Objectives for the coming plan period will continue to be as follows:

- 1. Continue to improve customer service and value for money to SHA
- 2. Continue to develop our staffing and working arrangements to ensure that Upkeep has a high performing culture and is seen as a great place to work.
- 3. Strengthen and develop the business to ensure ongoing viability
- 4. Deliver employability support and opportunities and continue to evaluate and review our social impact and role in the community going forward.

5. Ensure that Upkeep is achieving high standards of governance and compliance throughout the business.

The sections below provide more information about how we will seek to deliver against each of these Strategic Objectives:

5.1 <u>Continue to improve customer service and value for money to SHA</u>

We want to continue the good progress that has been made in recent years.

With SHA we will continue to review our ongoing performance against the Association's Social Housing Charter based and other KPIs (e.g. repair response times; void re-let times etc) and seek to continuously improve in this regard against the 2023/24 out-turn figures.

We will agree with SHA a revised service specification, clear performance measurement indicators and associated rate in respect of the close cleaning, back court maintenance, bulk uplift and landscaping services. We will participate where possible in any SHA tenant engagement relating to the ongoing development of these services and their costs.

SHA carried out its latest comprehensive Tenant Satisfaction Survey in summer 2023. One key finding was that satisfaction with the repairs service was 87%. This by any standard is a good result and continues to compare well with sector averages but does represent a drop from 95% three years earlier. The survey firm highlighted some dissatisfaction with aspects of the repairs service and an objective within SHA's Service Improvement Action Plan is to increase participation in the ongoing satisfaction survey and ensure that results are reviewed and lessons learned accordingly.

In conjunction with this it is intended that we complete the rationalisation process for the gathering of customer feedback. At present SHA and Upkeep independently gather feedback from customers following completed jobs. As SHA's data also includes the work of other contractors it needs to be streamlined to allow for reporting on Upkeep only jobs which would afford us a greater understanding of how the tenants feel Upkeep performs. It is also felt that Upkeep's feedback while useful may result in crossover and the group is keen to ensure that tenants are not contacted for feedback about the same job on more than one occasion.

It's also important to both parties that we have an efficient and effective invoicing process and we will support the review of repairs / finance and maintenance IT systems to simplify and reduce turnaround timescales.

5.2 <u>Continue to develop our staffing and working arrangements to ensure that</u> <u>Upkeep has a high performing culture and is seen as a great place to work.</u>

We want to further develop our staffing and working arrangements as part of the progression of our "people strategy".

- We expect to be able to complete and implement the review of review of salaries and pension arrangements and terms and conditions that was commenced in 2023 to ensure that these continue to be competitive.
- A new staff handbook will be introduced this year.
- We will commission our first independent survey of staff satisfaction with the aim of ensuring that we have feedback from all of our employees to help inform the ongoing development of our working arrangements.
- We still hope to be able to take advantage of the "Skills for Growth" programme (through Skills Development Scotland (SDS)), or similar, to identify other areas for potential improvement should funding become available for this.

SHA will be reviewing a number of HR related policies in the coming year and consideration will be given as to whether these should be Group-wide policies.

Real progress has been made in recent years in improving relationships between the two staff teams within the Group. We want to continue to develop this shared culture/ethos and understanding of common objectives between Upkeep and SHA staff. Priorities going forward will continue to include:

- Regularly updated information about how Upkeep's work and performance contributes to the overall work of the Group.
- Working Groups on areas of common interest with representation from both staff teams.
- Joint events for staff and Boards across the Group Another staff conference or similar event for everyone within the Group.
- The development of improved joint understanding of respective roles, responsibilities and financing arrangements within the Group.

5.3 <u>Strengthen and develop the business to ensure ongoing business viability</u>

Upkeep's financial position has strengthened considerably in recent years. Our objective going forward is to continue to develop the business and ensure its longer-term viability. There will continue to be a strong focus on the efficiency and effectiveness of the business and we will review the range and quality of trades and services offered on an ongoing basis.

It is important that there is a clear understanding of the respective income and costs (including apportioned overheads) of our different operating activities to enable an understanding of relative profitability. This information is also important for SHA as it reviews the charges it pays to Upkeep (and in some cases directly passes onto its tenants as service charges). Considerable progress has been made in this regard in the past year and we aim to continue with this.

The development of a new, updated, service specification for our caretaking services to SHA is a priority for the coming year as SHA consults with its tenants regarding its future rent and service charge structure. This will provide a platform for the negotiation of a multi-year contract for these services in due course. At present these are delivered on the basis of annual agreements only

Our main priority for the foreseeable future will be to meet the needs of SHA as our key customer. However Upkeep has successfully bid for work will some other customers, and will consider other significant opportunities that arise – particularly with neighbouring housing associations. This can significantly enhance the overall profitability of the company with additional income generated for marginal additional cost outlays.

Looking ahead there is potential for Upkeep to carry out some higher value and potentially more profitable, planned maintenance works for SHA e.g. through the kitchen replacement programme. To do this we will need to demonstrate that we can offer - and maintain – a service that represents relative value for money in comparison with other specialist providers. In the coming year we will carry out an assessment of our development needs in this respect, in conjunction with SHA, and agree an action plan accordingly.

5.4. <u>Deliver employability support and training opportunities and continue to</u> <u>evaluate and review our social impact and role in the community going forward.</u>

Upkeep has always had a strong focus on providing a wider social benefit to the local community and we want that to continue.

Whilst the local area has seen significant improvements during the lifetime of the housing association it continues to face a number of significant social and economic challenges.

For years Shettleston has scored highly in most of the indicators of deprivation. According to the 2020 Scottish Index of Multiple Deprivation (SIMD) 75% of the 16 data-zones (small areas of population) in our catchment area are in the most deprived 20% in Scotland and 62.5% are in the bottom 10%. The indicators used to establish deprivation include unemployment, health, and educational attainment so our community is poorer, unhealthier and has people with fewer qualifications and skills than more affluent parts of the country. The "cost of living crisis" will exacerbate these issues.

As such, providing good employment and training opportunities can make a very important difference. This was part of the Association's original drive for establishing the company.

We want to build on the significant achievements of recent years by continuing to develop and support new apprenticeships and other training opportunities. We also want to review the impact of this activity and promote and publicise our role, with the aim of further developing this aspect of the business.

Another significant way in which the company has impact is on the environment generally and through our carbon emissions in particular. SHA has committed to developing a "green strategy" for the Group in the coming year and we will fully engage with and support this.

5.5 <u>Ensure that Upkeep is achieving high standards of governance and compliance</u> <u>throughout the business</u>

Like any business Upkeep has legal and other governance requirements to comply with.

The fact that Upkeep is the subsidiary of a Registered Social Landlord provides an added dimension in this regard as SHA, the company's "parent" is subject to specific regulatory requirements in relation to the operation of Group Structures and means that Upkeep is, for example, subject to the provisions of the Freedom of Information (Scotland) Act.

Through its own self-assessment processes the Board of SHA has to assure itself that these requirements are being fulfilled and this means greater accountability and reporting requirements for Upkeep than would apply to many similarly sized private companies. This will continue to require a strong focus on governance best practice.

The Board continues to function well but is currently without a Chair after the previous post-holder was elected as Chair of the SHA Board and ot will be a priority to fill that position early in the 2024/25 year.

The Board still has just one independent Board Member, despite a Group-wide recruitment effort in the summer of 2023. Continuing efforts at targetted recruitment will be undertaken to help address this.

A Group-wide review of composition and capacity of Boards will be undertaken in the first half of 2024/25, with independent consultant support to respective Chairs, and the Upkeep Board will agree a Development Plan following on from this.

Given the relatively high-risk nature of much of the work carried out by Upkeep there is a need to regularly review health and safety arrangements and the Board's oversight of these.

There is an ongoing need to ensure that the governance framework for Upkeep and the Group remains appropriate and we will continue to annually review the relevance and operation of our key governance documents and ensure that the respective roles of the Board and staff (Upkeep and SHA) are clear and appropriate.

6. <u>Resources and financial projections</u>

6.1 <u>Overview</u>

Attached at **Appendix 3** is a copy of the five year financial projections for Upkeep. This is based on the approved budget for 2024/25.

The budget figures for 2024/25 have then been uplifted by 2% in the years that follow for both income and expenditure.

The projected costs for direct materials are based on the assumption that a set percentage of income is spent on these direct costs. 50% of income is projected as direct costs for year ending 2024/25 for reactive & void and 41% of income for planned & cyclical and major works. In respect of estate caretaking and cleaning activities, this is based on a 3% and 2% assumption respectively. Landscaping costs are also modest at 2%. These cost percentages are based on past trends however they will be closely monitored through the quarterly management accounts reporting.

These projections do not take into account any future growth or diversification opportunities however the plans can be updated as and when opportunities arise.

Upkeeps performance is dependent on the level of work instructed from SHA. As such, any changes to the planned activities of SHA in relation to repairs and maintenance, major works or service charge activities will impact on the results for Upkeep.

6.2 <u>Summary of Financial Results</u>

The results on Page 1 and 2 show that surpluses will arise in each of the financial years and range from £74,504 in 2024/25 to £124,039 in 2028/29.

Page 3 shows that the statement financial position is strengthening in each of the financial years due to the increasing profits; a positive net assets position is maintained over the 5 year period. At the end of March 2029, capital and reserves are expected to be £1,009,396.

On page 4, a summary of the cashflow shows that cash should increase and reach around £872,629 at the end of March 2029.

No account of gift aid or tax has been included in these projections.

							Actively monitor and benchmark salary levels.	НОр	o Ongoing							Upkeep will continue to track EVH salary increase for 2024/25 and keep				
10	Staff / HR	НОр	Upkeep adopts EVH pay rates / scale - this could negatively impact on charge out rates.	-	Reduced turnover and / or profit margin. Material costs have also been increasing.	Operational	Actively monitor and benchmark charge out rates.	НОр	Ongoing	1	5	5	Manage	Yes	pace with the Glasgow Living Wage which stands to rise from £10.90 per hour to £12.00 per hour for our level					
							Ongoing review of financial performance through management accounts / budgeting process.	CSM	Ongoing						1 staff. Ongoing review of profit margins for each activity.					

APPENDIX 2

Upkeep Business Plan: Delivery Plan 2024/25

Introduction

The Lead Managers referred to are as follows:

<u>Upkeep</u> :	но	- (Head of Operations - John Thomson);
	CSM 1	- (Corporate Services Manager - Karen Weir);
	ESM	- (Estate Services Manager - Paul McNeill).
Group:	CEO	- (Chief Executive -Tony Teasdale);
	DCCS	- (Director of Customer and Community Services - Craig Russell);
	DFCS	- (Director of Finance and Corporate Services - Kirsty Brown);
	DPS	- (Director of Property Services - Colette McKenna)
<u>SHA</u>	CRO	- (Community Regeneration Officer - Jamie Sweet);
	CSM 2	 - (Corporate Services Manager - Jo Farren);
	FM	- (Finance Manager - Ola Ajobiewe),
	НМ	- (Housing Manager -Sandra McIlroy);
	ICTM	- (ICT Manager - Lhyam Sumal);
	PSM	- (Property Services Manager - Matt Stewart)

Risk of non-achievement

- Low (Lost opportunity to improve but without significant adverse consequences);
- Medium (Significant performance, financial, strategic or governance implications);
- High (Severe risk and potentially business critical)

	Key priorities/tasks/projects/targets	Lead	Target	Risk if not achieved
1.	Continue to improve customer service and value for money to SHA			
1.1	Review and rationalise invoicing process through repairs / finance and maintenance IT systems to simplify and reduce turnaround timescales.	HO/PSM/ ICTM	Q2	•
1.2	Continue to review the impact of the new labour rates for 2024/25 which have been agreed at this point on the basis of assumptions regarding salaries and changes to staff pension going forward. Regard will be had to affordability to both Upkeep and SHA and the position to be initially reviewed at the mid-year point.	HO/DPS/ DFCS	Q3	•
1.3	Agree new rates, service specification and clear performance measurement indicators with SHA in respect of the close cleaning, back court maintenance, bulk uplift and landscaping services. This to be finalised following consultation by SHA with its tenants.	ESM/ DHCS	Q4	•
1.4	With SHA rationalise procedures for gathering and sharing customer feedback, reporting on this and sharing lessons learned.	CSM1/ PSM / HO	Q2	•
2.	Continue to develop our staffing and working arrangements to ensure that Upkeep has a high performing culture and is seen as a great place to work.			
2.1	Further develop our "People Strategy":			
	2.1.1 Commission a staff satisfaction survey and develop an action plan in light of results	HO/ CSM2	Q2	•
	2.1.2 Introduce a new Staff handbook	HO/ CSM2	Q1	•
	2.1.3 Explore scope for articipate in the "Skills for Growth" programme in conjunction with support from Skills Development Scotland (SDS) to identify other areas for potential improvement.	HO/ CSM2	Subject to funding availability	•

	Key priorities/tasks/projects/targets	Lead	Target	Risk if not achieved
2.2	Complete the review of salaries /pension arrangements and terms and conditions to ensure that these continue to be competitive.	DFCS/ CSM 2 / HO	Q1	•
2.3	Review the following HR policies:			
	Recruitment	CSM 2	Q1	•
2.4	Continue to develop a shared culture/ethos and understanding between Upkeep and SHA staff through:			
	2.4.1 Regularly updated information about Upkeep's work and performance and how this contributes to the overall work of the Group.	HO/CEO	Ongoing	•
	2.4.2 Establish/maintain Working Groups on areas of common interest with representation from both staff teams.	All	Ongoing	
	2.4.3 Hold joint events for staff and Boards across the Group	DFCS/ CSM 2	To be confirmed	•
	2.4.4 Develop improved joint understanding of respective roles, responsibilities and financing arrangements within the Group.	All	Ongoing	•
3.	Strengthen and develop the business to ensure ongoing business viability			
3.1	Continue to review and assess Upkeep's finances to ensure newly agreed charge out rates and reductions to contracted works to ensure ongoing profitability.	DFCS	Q2	•
3.2	Continue to review scope for additional external work that can be delivered in a way that strengthens the overall business without a drop in service to SHA	НО	Ongoing	•
3.3	Work with SHA to develop a plan for improving business capacity & performance aimed at being in a position to start winning contracts for more profitable business from SHA (e.g. kitchen replacements).	НО	Q3 2024/25	•

	Key priorities/tasks/projects/targets	Lead	Target	Risk if not achieved
4.	Deliver employability support and opportunities and continue to evaluate and review our social impact and role in the community going forward.			
4.1	Deliver additional apprenticeships and training opportunities: Secure CITB funding and college place to recruit an apprentice painter	HO/CRO	Q2	•
4.3	Actively participate in the development of a "Green Strategy" for the Group	HO/ ESM	Q4	•
4.4	Continue to review the "wider role" that Upkeep can play in the community.	HO/ CRO	Q4	•
5.	Ensure that Upkeep is achieving high standards of governance and compliance throughout the business.			
5.1	Continue to strengthen the Upkeep Board:			
	5.1.1 Members to elect a Chair of the Board	Board	Q1	•
	Seek to recruit one or more additional independent Board Members in accordance with targeted specialist skills / experience gaps.	CEO	Q2	
	5.1.3 Undertake the annual review of the composition and capacity of the Upkeep Board, with independent consultant support, and agree a Board Development Plan.	Chair	Q2	•
5.2	Provide further training to the Board on Member roles and responsibilities as company directors.	CEO	Q4	•
5.4	Review general approach to procurement having regard to the principles of openness, accountability and fairness contained within SHA's new Procurement Strategy and ensuring compliance with all procurement regulations/legislation directly applicable to Upkeep.	DPS/HO	Q4	•
5.5	Carry out a review of health and safety arrangements and reporting in-line with Group wide processes.	DFCS/ CSM2/ HO	Q4	•
5.7	Annually review the Intragroup Agreement and Service Sharing Agreement with SHA.	CEO	Q4
